Professional Growth Goals – 2003-2004

Create a webpage to showcase students' work
Teach students to use iMovie
Assemble e-portfolios for student work
Collaborate with Grade 2 teacher for sharing science activities and experiments

Reviewer's Comments:

You are the only teacher to directly link your goals to student learning in your reflections. Congratulations! Regarding your goals and activities, they are superb. You have so much to offer in terms of mentoring other teachers. I hope you will consider taking on a greater role in peer coaching K4 teachers in the areas of technology and science.

Suggested Goals for 2004-2005: You have identified your goals for the next school year as follows:

Your first goal is the schoolwide goal of implementing a technology-infused lesson plan. Your second goal will derive from the online course in Scrapbooking. Let me know if I can help in any way.

Required Goals for 2004-2005: (This section of goals is for teachers on a Teacher Assistance Plan.)

None
