February 15, 1996

Dear Dr. Oda,

I was able to observe Paula McCutcheon at Manoa Elementary school A+ from September 1993 to June 1995. My daughter Ivana was a student in Paula's classes for both second and third grade. I had the opportunity to see the creative activities Paula planned and implemented for the children. Paula taught a variety of subjects which included physical education, creative movement, art, and tumbling activities. She also assisted all of the children with their homework.

Paula was supportive and encouraging when instructing the children in all of their activities. She exhibited competence with children and incredible classroom management skills. I really liked knowing that Paula was a part of my daughter's education. She was very good at keeping me informed on Ivana's progress and difficulties. She has a friendly, upbeat personality and I felt very comfortable asking her questions.

Her ability to work well with co-workers and parents was very evident. Paula's concern for children, as well as her ability to work harmoniously with others, will assist her in being a great part of your teaching program. I am delighted to have this opportunity to recommend Paula McCutcheon for the Masters of Education in Teaching Program.

Sincerely,

Dr. Ljubica Bogic
